NAME
dotneato-config – Display Dotneato Library Configuration

SYNOPSIS
dotneato-config *OPTION* **[** *OPTION* **...]**

DESCRIPTION
dotneato-config is a script that is used to display the compiler and linker flags that are required for building applications that link to the dotneato libraries from GraphViz.

OPTIONS
--version
>   dotneato version information

--prefix   displays prefix of directory where dotneato was installed.

--exec-prefix
>   displays exec-prefix of the directory where architecture-specific parts of dotneato were installed.

--cflags   C pre-processor and compiler flags for use with dotneato.

--libs   dotneato library linking information

--libtool
>   dotneato libtool information
